Frank J. Martin Company

*The HitchSafe Vault, enclosed within the solid steel hitch receiver is secured via a 10,000-combination drawer INSIDE the receiver. The HitchSafe secures keys, credit cards, license and cash inside and is concealed / protected with an attractive dust cover.*

## New HitchSafe Secures Keys INSIDE the Hitch Receiver

Lynnwood, WA, September 7, 2006 – HitchSafe, a division of the Frank J Martin Company announces its innovative HitchSafe Key Vault that converts a 2" receiver into a VAULT.

The HitchSafe is **THE SOLUTION to the surfer's dilemma!** "Where to secure/hide keys while they surf." Especially with the new electronic keys... they can not be taken into the water. Traditionally, wherever the keys are stored, surfers had to always look over their shoulder to be sure they were not being watched by would-be thieves who could then just casually walk up to the vehicle as if their own, procure the key and steal the surfer blind!

The HitchSafe stores spare keys that will always be there when needed most. It is great for outdoor activities where carrying keys is a hassle and credit cards/cash left inside the vehicle would otherwise run the risk of being stolen.

The HitchSafe is secured with two hitch pins INSIDE the hitch receiver via two sliding metal bolts. The bolts can only be removed when the 10,000-combination drawer is removed.

The 10,000-combination HitchSafe spring-loaded drawer secures keys, license, cash and up to two credit cards. The HitchSafe is great for active lifestyles where items can be stored during outdoor sports with no need to hassle with carrying or losing keys/cards. The combination drawer is concealed and protected with an attractive dust cover.

HitchSafe is a division of the Frank J. Martin Company. The Frank J Martin Company is the manufacturer of security products such as the ShurLok Key Storage, Combi-Cam Cabinet Locks, Combi-Bolt and SOBO High Security Padlocks.
